

ANIMAL HOSPITAL — OF WAYNESBORO —

DENTAL CARE ESTIMATE

Basic Dental Cleaning and Polishing

- Pre-anesthetic blood screen.....\$62.55 - \$70.00
 - The pre-anesthetic blood screen is more cost-effective if done a prior to the procedure. Please ask us if you have questions about the best time to schedule this important procedure.

- Anesthesia, anesthesia monitoring, fluid therapy (to maintain blood pressure and keep the patient hydrated), cleaning and polishing, medication for pain, hospitalization
 - The fee depends on the level of dental disease
 - Cat or small dog (less than 25 pounds).....\$235.80 - \$281.15
 - Dog (more than 25 pounds).....\$262.70 - \$294.75

- **Other Services That May Be Necessary**
Each patient is evaluated after tartar and plaque have been removed. At this time, other problems may be identified and need to be addressed. The estimated fees for these services are as follows:

- Antibiotics—needed with gingivitis and extractions.....\$20.00 - \$70.00

- Dental x-rays—may be needed to evaluate tooth root health.....\$39.40 - \$123.35

- Extractions/tooth—only teeth that need to be removed will be extracted.....\$14.85 - \$110.75
 - The price for an extraction is based on difficulty and the time required for removal of all roots.

PLEASE NOTE: Extremely difficult extractions or dental surgery may increase the cost due to the time and additional anesthesia involved.

We consistently strive to keep all charges to a minimum while providing your pet the safest and best possible care.
